

## Assignment -2

Assignment Date	16/11/2022
Student Name	K.Venkatesh
Student Roll Number	212219060141

### Question:

Build a python code, Assume u get temperature and humidity values (generated with random function to a variable) and write a condition to continuously detect alarm in case of high temperature.

### Solution:

#### Python Code:

```
import random
import time
while True:
    temp=random.randint(1,50)
    humidity=random.randint(1,80)
    print("Temperature: ",temp)
    print("Humidity: ",humidity)
    if((temp>15 and temp<50) and (humidity>30 and humidity<60)):
        print("Room's Temperature and Humidity is Normal")
    print("Alarm OFF")    else:
        print("Room's Temperature and Humidity is Abnormal")
    print("Alarm ON")    time.sleep(1)
```

#### Output:

Sample.py - /home/palani/Desktop/Project Design & Planning/Sample....
